Two proposed mobile poultry units for free range egg production, four feed bins and new access track.
The Chair opened the meeting to comments from the public. These included, in summary, the following items:
 - There appears to be a lot of discrepancies in the reports attached to the application.
 - No proper site assessment has been undertaken
 - Concern was raised about the air pollution caused by ammonia and poultry dust.
 - No Impact Assessment on the environment or amenity of residents has been carried out
 - The highway is already dangerous. Adding further traffic to it would only increase this danger.
 - No consultation with the properties who are only 200 yards from the site has been undertaken.
 - House prices will drop significantly.
 - Little information about the storage of the 60 tonnes of waste, produced annually, has been given.
 - Concerns were raised about the run-off caused by the site and the subsequent increased pollution into the water courses.
 - Would increased water usage affect local water pressure?
 - Concerns about increased noise pollution were raised.
 - The site is unacceptably close to a residential area – that is within a conservation area.
 - The proximity to the areas River Wye SAC and nearby SSSI's, should mean that an Environmental Impact Assessment is undertaken.
 - The area is already recognised as a nitrate vulnerable zone.
 - The site would not bring additional employment to the area.
 - This way is a sustainable way of producing food.
 - Surface water from the surrounding areas already runs off across the site.The following advice was given from the clerk and Ward Cllrs in attendance:
 - All comments should be submitted to Herefordshire Council.
 - If possible comments should be kept to those that are materially relevant.

- Given the significant public interest, the application can be referred to the Planning Committee for a decision.
 - Planning Officers are now undertaking site visits.
- It was RESOLVED to OBJECT to this application for the following reasons:
- Impact this will have on the conservation area and listed buildings therein.
 - The traffic generation and highway access will make an already dangerous stretch of highway more so.
 - The noise and air pollution (including Ammonia and poultry dust) from the site will be unbearable for the nearby community.
 - The impact of the site on the life and amenity of the nearby community will be overbearing.
 - The environmental impact of the application on the nearby River Wye SAC and several SSSI's will be unacceptable.
 - The reports included within the application are based on presumptions.
 - The reports on particulate and odour dispersion should be expanded to cover a range of wind speeds, together with a record of the distribution of wind speeds across the site.
